**Telpar Introduces a High Speed 8 1/2 in Direct Thermal Printer
with Both Linux and Windows Print Drivers**

Print speeds up to 4.9 inches per second with USB, serial and parallel interfaces

Dover, NH –(May 4, 2009) – Telpar, one of the industries leading thermal printer manufacturer's specializing in design, manufacturing and distribution of self service Kiosk and specialty receipt printers, introduces the MTP-7582 a 8 ½ inch (216mm) thermal printer that delivers print speeds up to 4.9 inches per second (125mm/s) and offers both Linux and Windows print drivers. This new printer has USB, serial and parallel connectivity options that allow for even easier integration and increased productivity in a wide range of self service and kiosk printer applications including; way finding, product information, mapping, multimedia kiosks, gift registry, financial statements, pharmaceutical data, and remote printing applications.

The MTP-7582 thermal printer supports a print resolution of both 203 dpi with print speeds up to 4.9 inches per second (125mm/s) and 300 dpi with print speeds up to 3.9 inches per second (100 mm/s).

Print drivers are available for Linux, Windows 98, 2000, NT 4.0, Server 2003, XP, Vista and Windows XP Embedded and to maximize the MTP-7582 configuration versatility, a flash memory allows storage for; print logos, bar codes, graphics, customer specific text, and website pages. The MTP-7582 firmware can be reflashed with upgrades when connected to a host PC

The versatile paper roll positions of both horizontal and vertical mechanical orientation offer more design flexibility. To meet the needs of various applications, the printer accommodates up to an 8 ½ " Wide X 8" diameter roll of continuous paper that allows up to 1100 (8 1/2" X 11" (216 Mm X 79.4 Mm)) Sheets Per Roll. Paper options include continuous rolls, folded paper and marked paper. The MTP-7582 includes a guillotine paper cutter rated at 500,000 cuts.

Other printer features include a flip-up print head access design, easy-load paper system to facilitate paper roll replacement. Several sensors provide paper low, out of paper, top of form, document in presenter, print head up, dropped document and cutter jam.

- MORE -

Continuing Telpar's long-standing tradition, the printer is built with a metal frame for increased rigidity and durability in high use applications. The metal frame also provides better electrostatic discharge resistance than plastic. Each unit is backed with a one-year factory warranty and Telpar's technical service and support.

Available immediately, the MTP-7582 comes with three interfaces: USB, Serial, and parallel. To learn more about Telpar printing solutions, please visit www.telpar.com

About Telpar

For over 30 years Telpar has been dedicated to innovative printer engineering, manufacturing and integration. Telpar designs, manufactures and distributes worldwide, its own line of direct thermal and impact Kiosk and specialty receipt printers. In addition, Telpar distributes printer mechanisms and control electronics products from; Advanced Printing Systems (APS), Citizen America, Seiko, Epson America, and Fujitsu Components of America Inc. Telpar printer products are uniquely suited to Kiosk and Self-Service receipting or document generation for retail, health care applications, gift registry, medical monitoring, industrial instrumentation, and Cashless Gaming applications where a printed document is required.
