**Telpar Introduces a faster 2 inch Direct Thermal Printer with
print speeds up to 8 inches per second, the MTP 2822 printer
with USB, Network, Serial and Parallel Interfaces**

*Print Speed Up To 8+ Inches Per Second, USB, Network, Serial And Parallel Interfaces
Support A Broader Range Of Self-Service And Kiosk Applications*

Dover, NH – (April 12, 2011) – Telpar, one the of industries leading thermal printer manufacturers specializing in design, manufacturing and distribution of self service Kiosk and specialty receipt printers, has made enhancements on its “Best-in-Class” Stealth Series thermal printer line with introduction of the MTP2822 now with a print speed of 8 inches per second . This new 2 inch printer features; USB, network, serial and parallel interface connectivity, a faster print speed (up to 8 inches per second), allowing for increased productivity in a wider range of self service and kiosk printer applications; including gaming, self service vending, receipt ticketing, ATM, as well as many remote printing environments.

The Stealth MTP2822 high speed thermal printer now offers many key enhancements to the MTP 2200 printer series while delivering Telpar's tradition of durable and reliable printers. The new printer has the same footprint, but now uses a newly designed print head to provide double the print speed and print head wear life.

Key features include additional network connectivity options so users can easily integrate through USB, network, serial, parallel and Ethernet connectivity. These key interfaces provide more flexibility for use in legacy applications.

The new Stealth MTP 2833 high speed printer has a 2-inch (58 - 60 MM) paper width, and utilizes a faster Fujitsu printer mechanism that has print speed up to 8 inches per sec and 200 dots/mm resolution. It features a 6" (152.4 mm) diameter paper supply that yields approximately 550 feet (169 m) of output allowing for maximum integration flexibility. Options include; no paper spindle for fan fold paper applications.

To allow use in extreme temperatures, the printer was designed to have an operating temperature range of – 25 to +70 degrees C, solving a key challenge with thermal printing in terms of creating consistent images in cold environments.

- MORE -

“Telpar is improving its product line to meet customer demands for more speed and functionality at a value price.” Said Vicki Pillsbury, Telpar’s Vice President of Manufacturing.

The Stealth MPT2822 high speed printer offers the Telpar patented looping presenter, flip-up mechanism, and a retract-and-retain option for trouble free receipts and coupons. The printer is available with or without a built in auto cutter that provides a full or (partial cut for non presenter models). Sensors indicate Out Of Paper, Black Mark (For Top Of Form), Paper Low, Print Head Up, Cutter Jam And Document still in document presenter.

The product is closely aligned with key end user requirements. Telpar printers come complete with Windows drivers, enabling users to easily print graphics, text, barcodes, etc from Windows applications and other prevalent programs. Print drivers are available for Windows 2000 and XP. The thermal printer also has a flash memory allowing it to store and print logos making it a great choice for applications like hospitality, retail, ticketing and coupons.

Each unit is backed with a one-year factory warranty and Telpar’s technical service and support.

Available immediately, the RoHS compliant Stealth MTP2822 high speed printer comes with all four interfaces: USB, network, serial and parallel. To learn more about Telpar printing solutions, please visit www.telpar.com

About Telpar

For over 30 years Telpar has been dedicated to innovative printer engineering, manufacturing and integration. Telpar designs, manufactures and distributes worldwide, its own line of direct thermal and impact Kiosk and specialty receipt printers. In addition, Telpar distributes printer mechanisms and control electronics products from; Advanced Printing Systems (APS), Epson America, Fujitsu Components of America Inc. and Seiko. Telpar printer products are uniquely suited to Kiosk and Self-Service receipting or document generation, also, retail, health care applications, gift registry, medical monitoring, industrial instrumentation, and Cashless Gaming applications where a printed document is required.
